

## Find partners & clients via our database

Are you looking for opportunities for your company to find new commercial, technological or research partners from inside and outside Europe?

Enterprise Europe Network manages the **largest** European **database of partnership Opportunities** with thousands of business, technology and research cooperation **requests and offers from companies** and R&D institutions spread over + 60 countries. – quite anything you need!

Your Network advisor will help you integrating this powerful database by building an attractive **collaboration profile** to introduce yourself to your potential partners & will also assist you in finding your **ideal partner**.

**Do not get spammed!** Your Network advisor will filter the **most qualitative requests for connection**. Up to you to decide and initiate the contact and the cooperation.

You can also **customize e-alerts** for cooperation opportunities that come up from the database. For this, we will work together to create targeted and appropriate keywords for the industry/niche/area that you are seeking to find partners in. You also have to select the cooperation type that you are looking for: commercial, technological or R&D partnerships. The database will regularly send e-alerts directly to your mailbox, with proposals for cooperation from companies in Europe and beyond.
