

Technology Transfer Support & Exploitation

Have you developed a technology, meeting a need ? Do you want to transfer it to other players for commercial gains and/or greater societal use?

Did you participate to EU funded projects? Do you have results that could be exploited by others commercially or for other activities ?

If you are:

- ✓ A Brussels university/KTO (with or without spin offs)
- ✓ A research-intensive SME
- ✓ Or a large enterprise (as beneficiary of the transfer).

This is how we can help you :

- ✓ We foster **collaborations among academia, large enterprises and SMEs** and in particular **between Brussels-based entities and foreign players !**
- ✓ We focus on **SMEs that are currently not exploiting all the results of their innovation projects.**

Concretely

1. We can help you offer or request technologies via the largest [Database of Partnering Opportunity](#).
2. We collaborate with the KTO (Knowledge Transfer Officers) of Brussels-based Universities and other higher education institutions.
3. We collaborate with [NCP Brussels](#) and regional stakeholders to help owners of research results from public programmes (EU or regional) exploit them on the Single Market and beyond. We can help you look for international or local partners that will increase the Technological Readiness Level (TRL) of your project results. You can also receive relevant IP advice.
